GATOR TRAP®

MICROBIAL WASTE DIGESTER

Gator Trap is a unique blend of microbes formulated to digest organic wastes such as fat, grease, oil, protein, cellulose, starch and detergent. The naturally occurring microbes are dormant until hydrated in the Gator Trap solution. Once hydrated, the microbes enhance Gator Trap to transform harmful compounds into non-toxic by-products.

BENEFITS

- Reduces frequency of grease trap pump outs.
- Prevents drain line blockage.
- Reduces odors.
- Microbes digest compound; enzymes do not.
- Reduces overhead costs from grease trap pump outs.

APPLICATIONS

1. **Restaurant and other Food Service.** Use to clean and maintain grease traps, drain pipes, floor drains, and garbage disposals.
2. **Municipal Sewer Treatment Operations.** Digestion of organic wastes. Odor control. Prevent build up of fat and grease in piping.
3. **Industrial Wastewater.** Reduce build-up of fat and grease in piping.

USE DIRECTIONS

Grease Traps. Clean grease trap. Hydrate microbes in a solution of 1 gallon Gator Trap to 4 gallons water. Basic application for a 500 gallon grease trap is 5 oz. Gator Trap solution added every 6 hours.

Drains. For slow drains add 32 oz. to the drain. Follow with 1 gallon warm water. Add 2-4 oz. weekly. Please contact your sales representative if you have any questions regarding dilution.
