

Porta-Gator Spill Control System

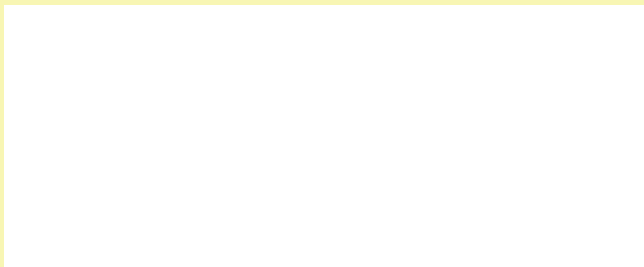

Part# PG-VT

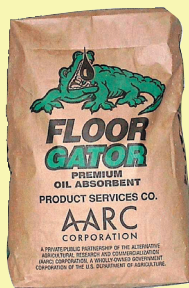

When used together, **FLOOR GATOR** and the **PORTA-GATOR** system can replace from 12-24 bags of traditional "clay (kitty litter) type" absorbents

The **PORTA-GATOR** system combines our multipurpose dispenser, made of 100% recyclable polyethylene plastic and our **FLOOR GATOR** absorbent composed of 100% natural ingredients. Combined, they are the most effective and economical oil cleanup and spill control system ever developed for your OSHA and waste minimization needs.

Distributed by:

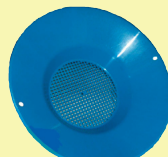

Apply **FLOOR GATOR** directly to the spilled liquid. If liquid is spreading, simply form a dam using **FLOOR GATOR** to contain the spill. Immediately begin sweeping the **FLOOR GATOR** back and forth through the liquid. **FLOOR GATOR** will absorb the liquid and will not require secondary cleanup if enough product is used. Once the liquid is absorbed the contaminated **FLOOR GATOR** should be swept up. **FLOOR GATOR** can be reused until fully saturated. Contaminated **FLOOR GATOR** can be disposed of by approved methods established by Local, Provincial and Federal regulations.

Part# GS-20

FLOOR GATOR®

- ALL NATURAL
- NON-CARCINOGENIC
- INCINERABLE
- BIODEGRADABLE
- ENCAPSULATES
- SUPPRESSES VAPOURS

Part#PS-20
Recycle
Screen

Fits on a 5 gallon pail
or small drum allowing
full use of absorbent
